

Ultimate DayCare!

Our Ultimate Daycare Program instills positive behaviors, confidence and good manners through games that reward obedience and focus, including fun puzzles, training games, climbing on obstacles and more!

DOGS WHO BENEFIT

Puppies who will learn to read social cues from other dogs in a fun and safe environment.

Highly intelligent dogs who become bored very quickly and may even become labeled as troublemakers.

The adult dog who is new to socialization but shows a big interest in interacting with other dogs.

Dogs born with a high drive who require both mentally and physically stimulating activities to allow them to relax when they get home.

Dogs on the shy side who may prefer human interaction over making new canine friends.

Adult dogs that love to have fun, but have a **shorter tolerance level** in larger groups.

Each enrichment activity is designed to provide an enhanced level hands-on care and to promote behaviors that strengthen the bond you share with your pet!

SMALL GROUP PLAY

Dogs play in a small group of 3-5 dogs, that are carefully selected based on energy levels, play styles and personalities. Small group play is perfect for dogs who are new to socialization or who feel overstimulated or overwhelmed in large groups.

ONE-ON-ONE ATTENTION

Your dog will receive the focus and undivided attention from our Enrichment Team during activity sessions. This is perfect for dogs that may be sensitive to group play, prefer human attention to that of other dogs, or are working on specific skills.

TRAINING GAMES

These include basic obedience, as well as trick training and help dogs achieve better concentration and impulse control. Training games are perfect for high-energy dogs and those who get overstimulated easily.

AGILITY / PLAY EQUIPMENT

Agility challenges dogs mentally and physically by fulfilling their natural instincts to run, jump, and chase. It is perfect for high energy dogs (working/herding/hunting breeds) and will help build confidence in dogs that may be insecure.

NOSE WORK

A dog's strongest sense is the sense of smell, and nose work provides a mental challenge in both decision making and problem solving. It also builds confidence, in that good choices are reinforced and rewarded. Nose work is great for all dogs of any breed, age, size.

**We look forward to discussing our
ultimate daycare program with you!**
